

The Caledonian Specialist Coater

The Caledonian is a highly versatile coating machine:

- Offers flexible low volume production
- New range of differentiated, high value products
- New product range is 'a beneficial addition' for existing and new customers

SMCL – Specialists in the Manufacture of Coated Papers for Variable Information Printing Applications- primarily sell rolls of self adhesive ticket and tag materials on paper and synthetic substrates to printers and manufacturers. The Company sells to customers based predominantly in the UK, Ireland and mainland Europe, plus export to Australia and South Africa. The original business was formed in the mid 19th century and has been for many years, a well recognised and respected name in the market place.

The company has industry leading experience in the field of thermal coating which is unique amongst its immediate competitor peer group and with its strong Management team, the company has a forward thinking vision for the future of being 'Positively Different'.

The Caledonian Specialist Coater

Positively Different
